The map illustrates the National Highway System (NHS) in Oregon, highlighting various route types and key locations. The legend on the left defines the symbols for airports, bus terminals, ferry terminals, truck/pipeline terminals, multipurpose passenger facilities, port terminals, truck/rail facilities, AMTRAK stations, and public transit stations. It also defines the line styles for different types of highways: Eisenhower Interstates (blue), other NHS routes (red), non-interstate STRAHNET routes (green), major STRAHNET connectors (light green), intermodal connectors (brown), intermodal/STRAHNET connectors (dark green), and unbuilt NHS routes (dashed red). The map shows the distribution of these routes across the state, with major interstates like I-5, I-84, and I-97 forming the backbone. Other notable features include the West Coast Over the Horizon Backscatter Radar System, the Boardman Naval Bombing Range, and the Camp Adair Military Reservation. The map also shows the locations of various airports, including Eugene, Medford, and Salem. The scale bar indicates distances in miles (0 to 50) and kilometers (0 to 100). The north arrow points towards the top of the map. The map is dated September 30, 2020.
